Nagar Yuwak Shikshan Sanstha's
Yeshwantrao Chavan College of Engineering
(An Autonomous Institution affiliated to Rashtrasant Tukadoji Maharaj Nagpur University)
Hingna Road, Wanadongri, Nagpur - 441 110
NAAC A++
Ph.: 07104-237919, 234623, 329249, 329250 Fax: 07104-232376, Website: www.ycce.edu
Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry–institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027(ODD)

Vision: Dream of where you want.	**Mission:** Means to achieve Vision

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	**Preparation**	**P: Preparation**	**Pep-CL abbreviation pronounce as Pep-si-lL easy to recall**
PEO2	**Core Competence**	**E: Environment (Learning Environment)**	
PEO3	**Breadth**	**P: Professionalism**	
PEO4	**Professionalism**	**C: Core Competence**	
PEO5	**Learning Environment**	**L: Breadth (Learning in diverse areas)**	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:
Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

"I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life." *to contribute to the development of cutting-edge technologies and Research*.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Srushti Chaudhari

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry–institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session	**2026-27 (ODD)**	**Course Name**	**LAB: Software Engineering**
Semester	**7th**	**Course Code**	**23CT1704**
Roll No	**24**	**Name of Student**	**Srushti Chaudhari**

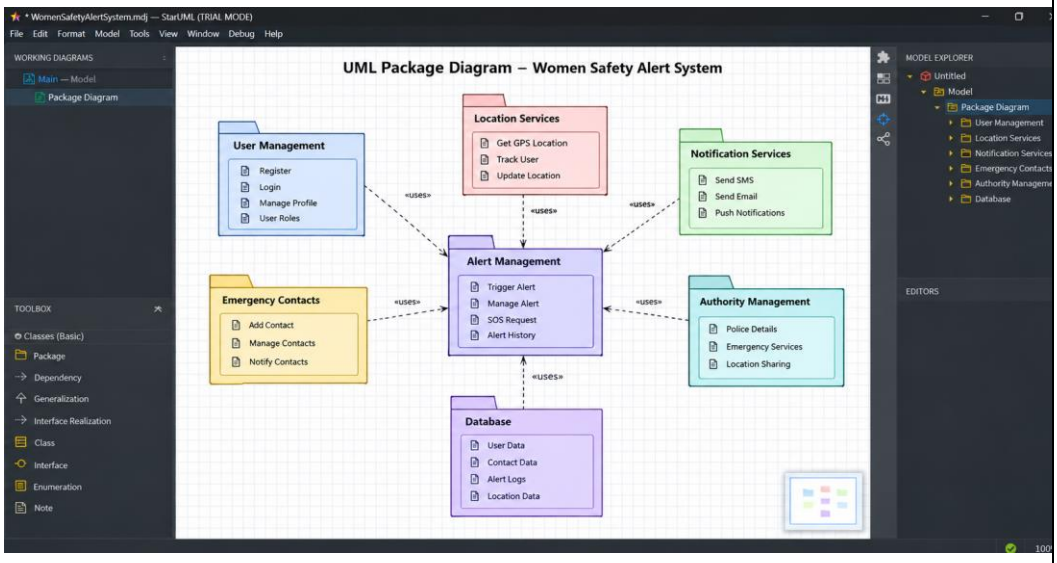

Practical Number	**6**
Course Outcome	Upon successful completion of the course the students will be able to; 1. Choose appropriate software engineering process model, requirement engineering principles and software designing fundamentals for a given project. 2. Select appropriate testing strategy and apply testing principles for testing a given application. 3. Apply basics of software configuration management, version control and change control in software development. 4. Evaluate cost estimation, effort and severity of software risk for given application. 5. Perform basic operations on Sub-version for software version control.
Aim	To study and draw the **UML Package Diagram** for the given case study – **Women Safety Alert System**.
Problem Definition	To design a UML Package Diagram for a Women Safety Alert System by dividing the system into different packages such as User Management, Alert Management, Location Services, Notification Services, Emergency Contacts, Authority Management, and Database.
Theory (100 words)	A UML Package Diagram is used to organize a software system into different packages or modules. Each package contains related functions and classes. It helps to understand the structure of a system easily. In a Women Safety Alert System, User Management handles registration and login. Alert Management handles emergency alerts. Location Services provides the current location of the user. Notification Services sends alerts through SMS, email, or push

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry–institute collaboration, Holistic, ethical and sustainable development for lifelong success.

	notifications. Emergency Contacts manages family members and friends. Authority Management handles police or emergency authorities. The Database stores user details, contacts, alerts, locations, and other system information.
Procedure and Execution (100 Words)	Algorithm(Steps): 1. Open **StarUML** software. 2. Create a new project. 3. Select **Package Diagram**. 4. Identify the main modules of the Women Safety Alert System. 5. Create packages for **User Management** and **Alert Management**. 6. Create packages for **Location Services** and **Notification Services**. 7. Create packages for **Emergency Contacts** and **Authority Management**. 8. Create a **Database** package. 9. Add related functions inside each package. 10. Connect the packages using dependency relationships. 11. Label relationships with **«uses»** where required. 12. Arrange the packages properly and save the diagram.
	Code: **Not Applicable.** A UML Package Diagram is a graphical representation, so programming code is not required.
	Output: 

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry–institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Output Analysis	The diagram clearly organizes the Women Safety Alert System into different packages. Each package performs a specific function, and the dependencies show how the packages interact with each other.
Link of student Github profile where lab assignment has been uploaded	https://github.com/SRchaudhari15/Software-Engineering-Practicals-24.git
Conclusion	The **UML Package Diagram** for the Women Safety Alert System was successfully studied and drawn. It divides the system into different packages and clearly shows their relationships, making the system easy to understand.
