Nagar Yuwak Shikshan Sanstha's
Yeshwantrao Chavan College of Engineering
(An Autonomous Institution affiliated to Rashtrasant Tukadoji Maharaj Nagpur University)
Hingna Road, Wanadongri, Nagpur - 441 110
NAAC A++
Ph.: 07104-237919, 234623, 329249, 329250 Fax: 07104-232376, Website: www.ycce.edu

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry–institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027(ODD)

Vision: Dream of where you want.	**Mission:** Means to achieve Vision

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	**Preparation**	**P: Preparation**	**Pep-CL abbreviation pronounce as Pep-si-lL easy to recall**
PEO2	**Core Competence**	**E: Environment (Learning Environment)**	
PEO3	**Breadth**	**P: Professionalism**	
PEO4	**Professionalism**	**C: Core Competence**	
PEO5	**Learning Environment**	**L: Breadth (Learning in diverse areas)**	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:
Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

"I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life." *to contribute to the development of cutting-edge technologies and Research*.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Srushti Chaudhari

Session	**2026-27 (ODD)**	**Course Name**	**LAB: Software Engineering**
Semester	**7th**	**Course Code**	**23CT1704**
Roll No	**24**	**Name of Student**	**Srushti Chaudhari**

Practical Number	**3**
Course Outcome	Upon successful completion of the course the students will be able to; 1. Choose appropriate software engineering process model, requirement engineering principles and software designing fundamentals for a given project. 2. Select appropriate testing strategy and apply testing principles for testing a given application. 3. Apply basics of software configuration management, version control and change control in software development. 4. Evaluate cost estimation, effort and severity of software risk for given application. 5. Perform basic operations on Sub-version for software version control.
Aim	To study and draw the data flow diagrams at level 0 and level 1 for the given case Study. (women safety alert system)
Problem Definition	To study, analyze, and draw the **Data Flow Diagrams (DFD) at Level 0 and Level 1** for the Women Safety Alert System. The diagrams represent how data enters the system, how it is processed, stored, and transferred between the user, emergency contacts, administrators, and emergency services.
Theory (100 words)	**A Data Flow Diagram (DFD) is a graphical representation of how data moves through an information system. It shows the flow of data between external entities, processes, and data stores. Level 0 DFD, also called a context diagram, represents the entire system as a single process and shows its interaction with external entities. Level 1 DFD decomposes the main system into major subprocesses and provides more detail about data processing and storage. For the Women Safety Alert System, DFDs represent user registration, authentication, SOS alert generation, location sharing, emergency-contact notification, alert storage, and communication with emergency services.**

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry–institute collaboration, Holistic, ethical and sustainable development for lifelong success.

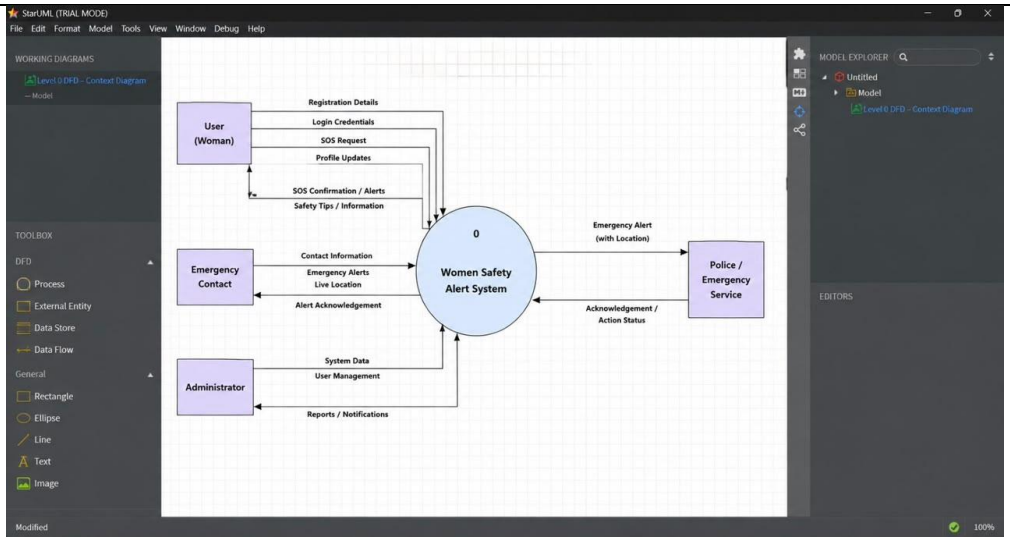

Procedure and Execution (100 Words)	Algorithm(Steps): **1. Start** **2. Study the Women Safety Alert System.** **3. Identify system entities:** • **User/Woman** • **Emergency Contact** • **Police/Emergency Service** • **Administrator** **4. Identify the main system process.** **5. Draw the Level 0 Context DFD.** **6. Identify internal processes for Level 1.** **7. Identify data stores.** **8. Draw Level 1 DFD.** **9. Label all data flows.** **10. Check consistency between Level 0 and Level 1.** **11. Save the completed diagrams.** **12. Stop**
	Code: **Not Applicable.** **This practical involves graphical Data Flow Diagram modeling rather than programming code. The DFDs are created using StarUML or another suitable diagramming tool.**
	Output:

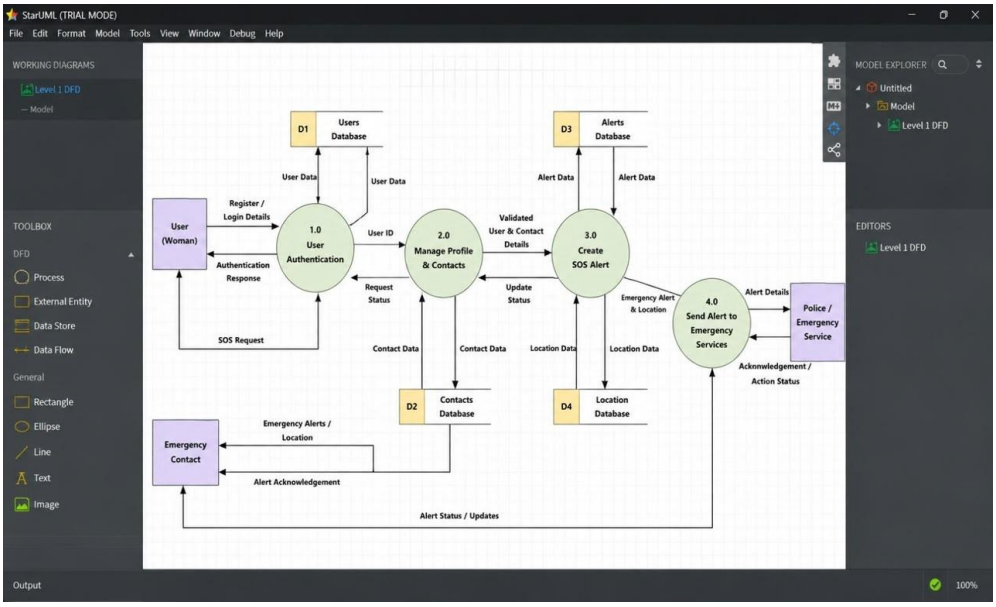

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry–institute collaboration, Holistic, ethical and sustainable development for lifelong success.

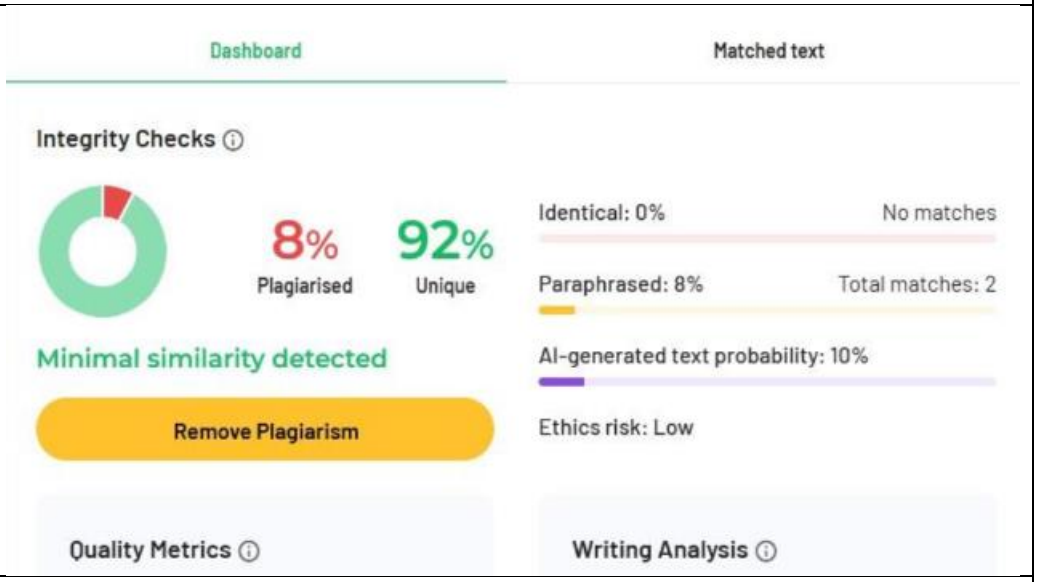

Output Analysis	The Level 0 DFD provides a high-level view of the Women Safety Alert System and shows its interaction with the User, Emergency Contact, Administrator, and Police/Emergency Service. The Level 1 DFD decomposes the system into major processes such as authentication, profile and contact management, SOS alert creation, and emergency notification. The data stores represent user, contact, alert, and location information. The diagrams clearly illustrate how information flows through the system and help in understanding the functional structure before implementation.

Github profile where lab assignment has been uploaded	
Conclusion	Thus, the Level 0 and Level 1 Data Flow Diagrams for the Women Safety Alert System were successfully studied and drawn. The diagrams provide a clear representation of data movement, system processes, external entities, and data storage. They help in understanding the system requirements and provide a foundation for system design and development.
