Nagar Yuwak Shikshan Sanstha's
Yeshwantrao Chavan College of Engineering
(An Autonomous Institution affiliated to Rashtrasant Tukadoji Maharaj Nagpur University)
Hingna Road, Wanadongri, Nagpur - 441 110
NAAC A++
Ph.: 07104-237919, 234623, 329249, 329250 Fax: 07104-232376, Website: www.ycce.edu

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry–institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027(ODD)

Vision: Dream of where you want.	**Mission:** Means to achieve Vision

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	**Preparation**	**P: Preparation**	**Pep-CL abbreviation pronounce as Pep-si-lL easy to recall**
PEO2	**Core Competence**	**E: Environment (Learning Environment)**	
PEO3	**Breadth**	**P: Professionalism**	
PEO4	**Professionalism**	**C: Core Competence**	
PEO5	**Learning Environment**	**L: Breadth (Learning in diverse areas)**	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:
Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

"I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life." *to contribute to the development of cutting-edge technologies and Research*.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Srushti Chaudhari

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry–institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session	**2026-27 (ODD)**	**Course Name**	**LAB: Software Engineering**
Semester	**7th**	**Course Code**	**23CT1704**
Roll No	**24**	**Name of Student**	**Srushti Chaudhari**

Practical Number	**4**
Course Outcome	Upon successful completion of the course the students will be able to; 1. Choose appropriate software engineering process model, requirement engineering principles and software designing fundamentals for a given project. 2. Select appropriate testing strategy and apply testing principles for testing a given application. 3. Apply basics of software configuration management, version control and change control in software development. 4. Evaluate cost estimation, effort and severity of software risk for given application. 5. Perform basic operations on Sub-version for software version control.
Aim	To study and draw UML Use Case diagram for the given case study. (women safety alert system)
Problem Definition	To study, analyze, and draw a **UML Use Case Diagram** for the Women Safety Alert System. The diagram represents the functional requirements of the system, identifies the actors interacting with the system, and shows the major services provided by the system. It also represents relationships such as <<include>> between different use cases.
Theory (100 words)	**A Use Case Diagram is a behavioral UML diagram used to represent the functional requirements of a software system. It shows the interaction between external entities, called actors, and the functions or services provided by the system, called use cases.**

	Actors may be users, organizations, devices, or other systems that interact with the software. A system boundary defines the scope of the system. Relationships such as association, <<include>>, and <<extend>> describe interactions and dependencies between actors and use cases. For the Women Safety Alert System, the Use Case Diagram represents activities such as registration, login, sending SOS alerts, sharing location, managing emergency contacts, viewing alert history, and contacting emergency services.
Procedure and Execution (100 Words)	Algorithm(Steps): **1. Start** **2. Study the case study.** **3. Identify system actors.** **4. Identify system functions/use cases.** **5. Create a Use Case Diagram in StarUML.** **6. Draw the system boundary.** **7. Add actors outside the boundary.** **8. Add use cases inside the boundary.** **9. Connect actors and use cases using associations.** **10. Add <<include>> relationships where necessary.** **11. Check the diagram for correctness and completeness.** **12. Save the diagram.** **13. Stop**
	Code: **Not Applicable.** **This practical involves graphical UML modeling and does not require executable programming code.**
	Output:

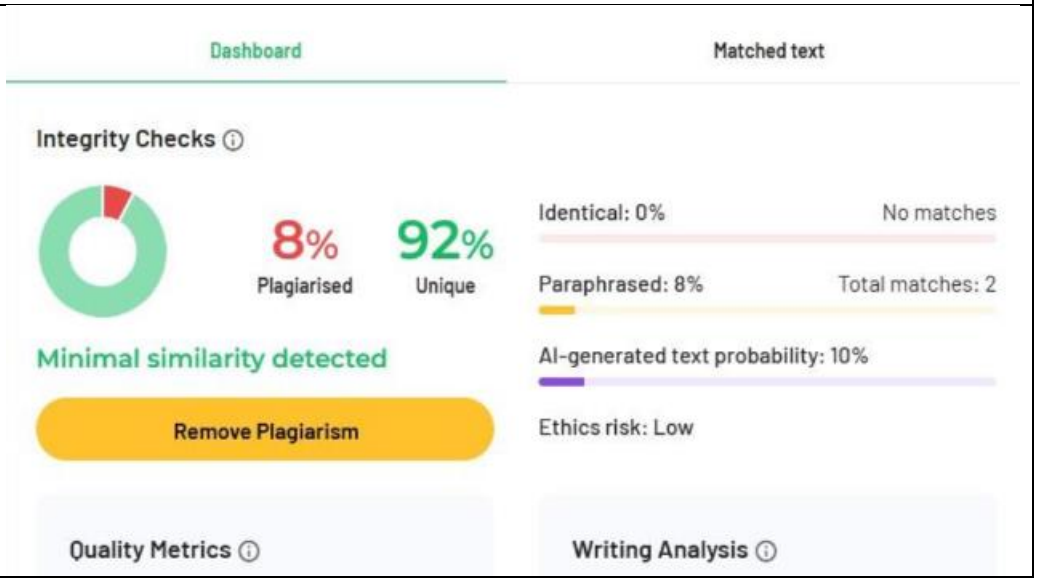

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry–institute collaboration, Holistic, ethical and sustainable development for lifelong success.

<table>
<tr><td></td><td> 
</td></tr>
<tr><td>Output Analysis</td><td>The Use Case Diagram clearly represents the interaction between the Women Safety Alert System and its external actors. The User can register, log in, manage their profile and emergency contacts, send SOS alerts, share their location, view alert history, and access safety information. Emergency Contacts receive emergency notifications, while Police/Emergency Services can receive emergency alerts. The Administrator manages users and monitors reports and alerts. The <<include>> relationships show the supporting functions required during the SOS alert process.</td></tr>
<tr><td>Link of student Github profile where lab assignment has been uploaded</td><td>https://github.com/SRchaudhari15/Software-Engineering-Practicals-24.git</td></tr>
<tr><td>Conclusion</td><td>Thus, the UML Use Case Diagram for the Women Safety Alert System was successfully studied and drawn using StarUML. The major actors, system functionalities, associations, and include relationships were identified and represented graphically. The diagram provides a</td></tr>
